GREG GARGIULO

AI Product Builder & Full Stack Developer

Paris · **greg.gargiulo.pro@gmail.com** · Portfolio: **6gbigalt.github.io** · LinkedIn: **linkedin.com/in/g-gargiulo**

With coding agents (Claude Code, Antigravity), I design business applications and automations and put them into production: I set the rules, make the decisions and check the result on screen and through tests. I spent thirteen years in television, then a year and a half in sales operations; several of my tools come from those jobs: sales follow-ups, CRM audit, video processing.

Seeking: permanent role, full stack, AI or automation developer · from January 2027 · Paris area, on site, hybrid or remote.

Professional experience

AI Product Builder & Full Stack Developer, apprenticeship · Circul'Egg — January 2026 – January 2027

Biotech turning eggshells into ingredients, winner of the 2023 Grand Prix of the French Académie des technologies.

- Designed and built alone, in five months, the **production ERP**, live since 5 October 2026: batch traceability from intake to shipping, data entry on phones even offline; 1,776 tests, 189 dated design decisions. React, TypeScript, PWA, IndexedDB, Vercel, Airtable.
- Automated **sales follow-ups**: 7 live workflows prepare draft emails every morning, which the sales rep reviews and sends, and file meeting reports in the CRM. n8n, Claude, Pipedrive, Outlook.
- Built **Egg'Change**, a mobile lead capture app used at trade shows since Vitafoods 2026: over 100 qualified contacts a day, even offline. Flutter, Firebase, Gemini.

Technical Co-founder · Nexus, side project — May – October 2026

AI assistant for SME sales teams (14 connectors). Born from a student project; no company formed, never deployed, on hold.

- Designed **proactive detection** and the **CRM audit**, checked against an 85-point grid.
- Built the **automation engine** that replaced Activepieces: natural language, validated steps, signed webhooks.
- Wrote the **agent guardrails**: writes always confirmed, prompt injection defense, isolated SQL, chained audit trail.
- Built the **React interface** and product foundations (Stripe payments, quotas, GDPR). Python, FastAPI, LangGraph, TypeScript.

Sales Ops and Sales Consultant · WeSale, on assignment at Super Capital and AccessAir — May 2024 – September 2025

- Deployed and configured **CRMs** for SMEs and startups (tech, business aviation, venture capital). HubSpot, Attio, Sellsy, GoHighLevel.
- Automated **multichannel prospecting** and follow-ups. n8n, Lemlist, PhantomBuster, Aircall, Ringover.

Deputy Editor-in-Chief · ARTE, Tracks (Program 33) — 2010 – 2022

- Contributed to the editorial line (story and angle selection) of **Tracks**, a magazine broadcast across Europe, and coordinated journalists, shoots and production.
- Supported each story through editing and voice-over, and directed my own. In parallel, executive producer at VICE Media (2019-2020): French adaptation of an American series, team of 12.

Personal projects

- **Onyx** (prototype): personal AI agent that acts in Gmail, Google Calendar and Notion. Once a day, it consolidates its memory and draws rules from the corrections it receives. 919 tests. Python, FastAPI, LiteLLM, ChromaDB, Neo4j.
- **Video normalizer**: footage from any source brought to one format before editing, then checked file by file. Python, ffmpeg.

Private code; every project on this resume is detailed as a case study on the portfolio (in French), demo on request.

Skills

Development: TypeScript, JavaScript, React, Node.js, Python, FastAPI, REST APIs, Dart, Flutter
Databases: SQL, PostgreSQL, Supabase, Airtable, IndexedDB, ChromaDB, Neo4j
AI and agents: LLMs (Claude, Mistral and Gemini APIs), LangGraph, LiteLLM, MCP, Claude Code (VS Code), Antigravity
Quality and delivery: Git, CI/CD (GitHub Actions), Vitest, Playwright, pytest, Docker, Vercel
Automation and low-code: n8n, Make, Zapier, FlutterFlow
Method: written scoping, decision log, tests seen failing before being kept; Merise, UML, Figma

Education

Application Designer and Developer (bachelor level) · Alegria Academy — October 2025 – present

French RNCP 37873 title, level 6, as an apprentice at Circul'Egg: Merise, UML, algorithms, FlutterFlow, Supabase, data and AI.

Marketing and Sales Manager (four years of higher education) · Rocket School, Paris, top of the class — 2025

Certifications, languages and interests

Certifications: n8n, levels 1 and 2 (June 2026); Make Certified, level 4 Advanced (March 2026)
Languages: French (native), English (B2)
Interests: running, CrossFit, combat sports, cinema, contemporary art
